PROFILE SUMMARY

Accomplished Software Engineer specializing in Adobe Experience Manager (AEM), Proficient in Java, JavaScript, HTML, and CSS, adept at developing scalable and standards-compliant web applications. Experience in creating and optimizing AEM components, templates, workflows, and integrations for performance and usability cross-device compatibility to deliver seamless user experiences. Skilled in Agile methodologies and tools, ensuring effective project management and timely delivery.

WORK EXPERIENCE

Applications Development Analyst, *Accenture* **☑**

- Joined Accenture and was assigned to the AEM stream training program, successfully completing hands-on training in Adobe Experience Manager, Java, and web technologies.
- Post-training, assigned to TD Bank as a Content Author, managing AEM content workflows, assets, and digital publishing processes.
- Later transitioned to a development role, contributing to multiple AEM backend initiatives across global client projects, including Caterpillar.
- Received the **Accenture Extra Mile Award Team Category** for delivering exceptional outcomes with agility, collaboration, and innovation aligned with Accenture's "One Accenture" culture.
- Built and maintained AEM 6.4/6.5 components using Sling Models and HTL to improve reusability and content management efficiency.
- Created Java-based OSGi services to integrate external APIs and backend logic with AEM, optimizing for performance and scalability.
- Worked closely with cross-functional Agile teams to ensure delivery of responsive, accessible, and brand-compliant digital experiences.

Developer, Caterpillar □

- Engineered advanced AEM 6.5 Touch UI components using Apache Felix OSGi framework for dynamic and scalable solutions.
- Debugged and enhanced AEM applications to ensure seamless user experiences across all touchpoints.
- Developed technical documentation to support ongoing maintenance and team collaboration.
- Worked with GitHub and Git clients such as SourceTree for version control.
- Contributed to best practices for coding standards within AEM development projects.
- Actively contributed to Agile methodology teams.

Bengaluru, india

AEM Author, *TD Bank* □

- Designed and published web and mobile content adhering to strict brand standards and usability guidelines.
- Managed AEM workflows and DAM to effectively organize and deploy digital assets.
- Conducted quality assurance checks to ensure high content accuracy and consistency.
- Created and managed engaging content for company blog, increasing readership by 30% over six months
